

TIMBERNOOK: NATURE BASED LEARNING

TimberNook provides a truly authentic outdoor experience for children. TimberNook is no ordinary programme as it shifts focus from how the child can help the environment to how the environment helps the developing child. Our therapeutic activities & enriched natural environments are designed to ignite creativity, problem solving and imagination in children. We encourage children to take age-appropriate risks, try new things, and challenge their body and mind in new ways in a safe environment and under the careful (but not hovering) supervision of the TimberNook team! A range of programmes offered for children aged 1-13years. PLD available too.

At TimberNook we don't entertain – we empower!

'TINY ONES' &
'LITTLE WILD ONES' -
