

HB Tuatara - Out in Nature.

On Monday of week 4 we went on our first nature play adventure. This was inspired by the Nature

We decided to start our adventures close to school and just walked across the road where we had long grass, hills for rolling down, a gully and trees to play in. We also took our reading books and had our reading lessons on a blanket. All the adults were amazed at how much learning just developed naturally. Children worked together to plan huts, explored flowers and tried out different ways of rolling/tumbling down the hills. They also discovered a huge drain (empty of water) to play in and experimented with different sounds they could find there.

Some children then decided maybe this was the perfect place for us to act of the Bear Hunt - we had long swishy grass, a river area (empty of water at present - but we can imagine!), a forest and the bear's cave.
